Raising Awareness about ISO 31000 in Germany

**Toronto, Canada
Panel May 29th, 2013**

German Position at the Time of Creation of ISO 31000:

- **Mirror Committee NA 095-04-02 AA at DIN**
 - no updated list of members (currently 13; last update 2011: 17 & 1; out of those 8 from associations and 4 from government/university, 3 from business and 2 consultants)
 - most active members are working safety and/or security related
- **Dokument NA 095-04-02 AA N 277 (potential suggestions for improvement 2010-05-26)**
 - ISO 31000 is too weak on human safety, environmental conservation, and health protection
 - Risk in other ISO-norms, national and International legislation on human safety, health protection and environmental conservation is always negative
 - the rule of law needs to be stated more clearly
 - no balancing of costs against safety, environment, health, or legal obligations

E DIN ISO 31000:2011-01

- **Publication on January 10th, 2011**
 - verbatim translation with a national preamble and national notes added (see memo for G31000 on herdmann.de) published for review and comments
 - withdrawal decision on September 1st, 2011; accordingly withdrawal proceedings have been initiated two years after publication at the beginning of this year
- **National Preamble**
 - see document NA 277; also stresses impact on other norms and risk of certification
- **National Notes**
 - 11 notes essentially repeating the arguments of the preamble with special emphasis on the weakness regarding the rule of law, safety, protection of human health, and certification (management system)

Latest Developments

- **ISO Project Committee 262 becomes technical committee ISO/TC 262**
 - Mirror Committee NA 095-04-02 AA takes vote on Status of DIN (participate actively instead of observer status) and looks for new members (website [DIN](#))
- **Work of Mirror Committee NA 095-04-02 AA**
 - vote on review of ISO 31000
 - vote on review of ISO Guide 73:2009
- **What else:**
 - on XING essentially a group for German members officially endorsed by G31000
 - AMS applied for membership
 - training workshop for Germany in preparation
